Timeless, box n'blox and exclusive: Gravis, the universal storage system

Gravis sideboard range (design: wiege): the box n'blox design allows perfect coordination with table finishes and interior design in high-calibre functional quality. Photo: Wilkhahn

For conference rooms with a high-calibre interior it is of paramount importance to team the table range with the storage furniture to create a coherent overall appearance. This is, after all, a key place for communicating corporate values: by means of the perfect functions of the storage units, first-class workmanship and well coordinated surface finishes. With Gravis, the wiege design studio has designed a range of "box n'blox" storage units to meet these very requirements.

The sideboard, available in two heights (584 / 872 mm), comprises one, two or three "cores", each 1000 mm wide. The shell, with mitre joints, consisting of side panels, a back panel, a unitary top as well as doors and door fronts, is available in all veneer finishes that are also used for Wilkhahn table ranges. A back painted coloured glass surface is also available as a "neutral" surface – if the interior is dominated by stone or high-tech materials. Due to the precise contours of the timeless box n' blox form, Gravis also teams well with all table ranges.

Gravis sideboard range (design: wiege). For connoisseurs and classicists: with high-quality aesthetics and fascinatingly convenient operating functions marked by state-of-the-art technology. Photo: Wilkhahn

The outer form may be understated, yet the operation and design of the storage elements is fascinating: drawers and doors with a damped mechanism for opening and closing with finger pressure, drawers with self-closing runners, optionally with motor driven drawer extension, and a concealed, radio-wave locking system ensure highly convenient quality in use.

A depth of 600 millimetres allows easy integration of everything that is vital in a conference environment: from media control equipment and refrigerators to a retractable projection screen.

Wilkhahn

Gravis is available from early 2009.

**You can find Wilkhahn at Orgatec 2008 in Hall
10.2. Stand Q10/P11**
